

Water Loss,
Financial Assistance,
Thresholds & Waivers

Thresholds

If a retail public utility's total water loss meets or exceeds the threshold for that utility, the retail public utility must use a portion of any financial assistance received from the board for a water supply project to mitigate the utility's water loss. Mitigation will be in a manner determined by the retail public utility and the executive administrator in conjunction with the project proposed by the utility and funded by the board.

Waiver

On the request of a retail public utility, the board may waive the requirements of this subsection if the board finds that the utility is satisfactorily mitigating the utility's system water loss. The request for waiver should be addressed to the executive administrator and include information about the utility's current or planned activities to mitigate their water loss and their source of funding for that mitigation.

Applications

50 Commitments for Water Supply Projects

- 22 were submitted prior to January 1, 2015
- 9 did not meet their water loss thresholds
 - 1 revised in the application process
- 2 waivers were requested and approved
- 4 additional included water distribution system improvements
