Subject: WG#4 Library Draft

Attachments: Texas Water Conservation Resource Query System.doc

CC: "Comer Tuck" <Comer.Tuck@twdb.state.tx.us>
Vanessa and Comer, attached is my first draft of the resource library action item from our last conference call. This action item and the BMP update procedures were to be developed by me and TWDB staff. I see that you have posted the BMP draft I sent earlier on the web but thus far I have not received any comments on it. Have you? I assume you did not have any changes you wanted to make to it? Once we are together on this resource library draft how do we notify the members of WG#4 that the two drafts are there for their review and comment? Maybe we want to go ahead and ask for input from the group to schedule a conference call to discuss these drafts and encourage them to post their comments so everyone can see them. I suggest we shoot for the March 12-14 time period so we can have time to integrate any comments and have a second draft to take to the April 1 Council meeting. Please feel free to call me today at the number below if you want to discuss the drafts or schedule. I have a Region O meeting in Lubbock tomorrow so will be in West Texas the rest of this week.
