**Attachments:** Tx Water Conservation Library 031208.doc

**CC:** "Comer Tuck" <Comer.Tuck@twdb.state.tx.us>

I figured if Comer can handle his action item before he left work I could get my assignment done as well. Attached are redrafts of the two documents we discussed in today's conference call. I suggest we get them out to the WG and ask for all comments by March 20. Hopefully we can then get the documents out to the full Council on the 21st or the first of the following week so they will have at least a week to read them before the next meeting. I saved both documents with the final version showing but anyone can switch to "Final Showing Markups" if they would like to see all the changes. I suggest we send it out to the WG this way but when we distribute to the Council in a week or so we accept all changes and just send them our recommended language.

Thanks so much for the help!
